

DOUBLE
ADDED
VALUE

S33mx

Cooling time reduction and interlocking
with different based boxes allowed.

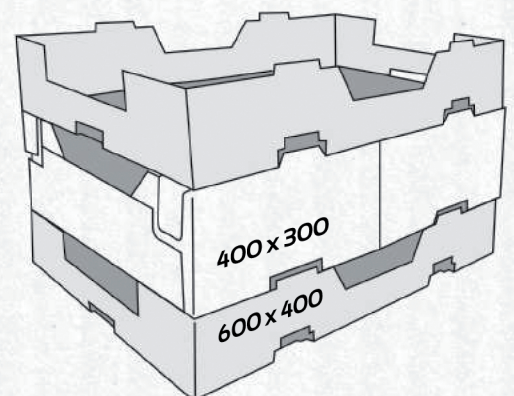

Technical benefits

- Special for transport of fruit and vegetables packed in terrines or alveoli.
- Better air circulation due to the big windows sited at the four sides.
- Better product visibility.
- Technological institutes endorse its advantages of cooling capacity and improving product quality during transport.
- Easy picking. Based boxes of 400 x 300 can be interlocked with based boxes of 600 x 400 in the same row of the pallet. Upper and lower position.

Economic benefits

- Reduction of board consumption.
- Logistics savings: Least time to cool down products needed.
- Optimization and improved ventilation of the product during transport.
- Logistic improvement with picking optimization.

Graphic design service

- Our highly qualified team will advise and work on improving the image of its product, using the most advanced printing techniques.
